

Transforming Data. Elevating Care.

Proven data lifecycle solutions that optimize healthcare operations and support patient care.

Harmony Healthcare IT is a data management firm that moves, stores, and manages patient, employee, and business records for healthcare organizations.

Since 2006, our U.S.-based experts have built our reputation transforming critical data into secure, compliant, and accessible assets – whether that is converting data to a new platform or securing it in an archive. Our work combines dedicated service with intuitive, award-winning technology. Our commitment to service, reliability and innovation empowers healthcare organizations to manage their data with confidence, enabling greater focus on patient care.

Why Choose Harmony Healthcare IT?

Expertise

500+ healthcare clients and 700+ software brands optimizing data management across diverse systems.

Quality

Proven 90+ customer loyalty indicator for successful data projects.

Value

Affordable, scalable solutions provide a smart return on investment

Security

HITRUST Certified, with 560+ controls and 24/7 endpoint monitoring to protect data.

Who We Serve

Whether it is a clinical, financial, administrative, or business software application at your healthcare facility, we've got you covered. No matter the source system, it's likely we've already worked with it. Here are just a few we work with frequently:

Harmony Healthcare IT's trusted data management solutions serve individual practices to large health systems. Beyond acute and ambulatory, we work with speciality organizations like blood banks, perinatal units, community health centers, long-term care centers, retail health clinics, pharmacies, correctional facilities, student health centers, and more.

Within a healthcare organization, our products and services support those working in:

- Information Technology
- Health Information Mgmt.
- Accounts Receivable
- Compliance & Legal
- Mergers & Acquisitions
- Clinical
- Human Resources
- Finance
- Research
- Quality

One Platform to Convert, Archive and Manage Data

Decrease cost, reduce risk, and gain greater control over your data to help keep your focus where it matters most: supporting patient care.

HEALTHDATA PLATFORM

Data Services

End-to-end healthcare data management—from extraction to compliant retention.

- Extraction
- Migration / Conversion
- Records Release

Legacy Data Management

Optimize and protect historical data with cost-efficient storage and access.

- Hot Storage—Active Archive
- Warm Storage
- Cold Storage

Live Data Solutions

Data automation to improve operations and reduce costs related to live data in the go-forward EHR.

- Registry Management

Primary Platform Products

HEALTHDATA ARCHIVER

Secure, intuitive active archive for clinical, financial, and business records with role-based access and streamlined user workflows, including A/R wind down.

HEALTHDATA LOCKER

Provides cost-effective cold and warm storage for inactive data that does not require daily record access by staff members via a user interface.

CLEARWAY

AI-driven data abstraction automation for faster, more accurate clinical registry submissions.

Challenges Health Data Platform™ Helps With

New System Implementation – Ensure seamless system transitions with secure data extraction, conversion, and archival.

Technology Consolidation – Rationalize applications across the enterprise to reduce cost and risk.

Cybersecurity – Reduce data silos and secure your data, mitigate risks, and ensure compliance

Data Interoperability – Consolidate and integrate platforms for smoother workflows (EHRs, auditing and reporting tools, and more).

Registry Participation – Automate clinical registry reporting with AI-powered technology, reducing staff time and errors.
