

Hosted Server Solution for The Medical Manager®

Offsite Server Performance & Security

What is a Hosted Server Solution?

As an alternative to purchasing, housing and maintaining a server at your medical practice, you can now utilize a dedicated server from us. The server will be configured to meet your system computing needs, however, it will reside in our data center and be accessed by your users securely over the Internet.

Why use a Hosted Server Solution?

One of the main reasons to choose hosting is to avoid a large expense when it's time to replace your server. Hosting allows you to spread the up-front cost of the server out over time through a fixed monthly fee. Another benefit is that both server administration and security becomes our responsibility. We become your offsite IT team, ensuring the proper care of the hardware and taking on the responsibility of data backup and disaster recovery.

Harmony Healthcare IT is an award-winning data management company with a commitment to the security of data. As such, we adhere to 500+ physical and process controls in a certifiable healthcare security framework, HITRUST CSF®.

Server Hosting Benefits

- Reduced costs and a clear ROI with fixed fees
- Peace of mind with 24x7 proactive monitoring, 365 days per year
- Single point of contact for any server issues
- Round-the-clock access to highly skilled techs
- Reduced technical infrastructure and burden for system maintenance and backups
- Ability to be set up for remote access to The Medical Manager® system
