

Secure Record Delivery

Consumer access to historical records

The 21st Century Cures Act (Cures Act) mandates that a patient may gain access to all of their electronic health information (EHI) in a timely manner and free of charge. The information blocking provision of the Cures Act may associate penalties to provider organizations that limit a patient's access to their full EHI clinical narrative.

Powered by:

HEALTHDATA INTEGRATOR

Data Activation for Interoperability

Secure Record Delivery allows for the transmission of a patient's historical record from HealthData Archiver™ to an EHR endpoint, which may include a patient portal. This solution allows patients to access their historical record which helps satisfy the Information Blocking provision of the Cures Act.

High-level Features:

1. Satisfies Data Blocking Provision of Cures Act
2. Patient-by-patient Workflow Driven
3. Historic Patient Level Chart
4. Configurable Content
5. HL7 v2 PDF Format
6. Secure Delivery (e.g., API, VPN, HTTPS, SFTP)
